

Data Science Career Launchpad Schedule

Week 1: Data Science Industry Immersion Week (Dec 7th-Dec 15th 2019)

Week 1 of Data Science Career Launchpad is all about taking first steps to get ready for career transition.

In this week, you will firstly interact with Senior Partner, The Math Company to understand how to convert business problems into Data Science problems.

After that you will spend time on mapping your profile and career objectives, listing your strengths and weaknesses, how should you switch- internally or externally.

Week 2: Data Science Portfolio Week (Dec 16th – Dec 22nd 2019)

In week 2, you'll build stellar linkedin, github portfolios and also learn how to participate in Kaggle competitions. This week will be extremely crucial as a great github portfolio, for example, can be make or break. Similarly, a great Kaggle portfolio can give you significant advantage while appearing for interviews.

Week 3: Preparing for Data leadership Roles Week (Dec 23rd – Dec 31st 2019)

Week 3 is for you if you're thinking big and looking to emerge as a leader in Data Science. This week will help you reach Data leadership roles through **INSAID Spotlight, Budding Data Science Leader Awards etc.**

Week 4: Data Science Interview Prep Week (Jan 6th - Jan 11th 2020)

In Week 4, you will understand how to prepare for Data Science Interviews questions, mistakes to avoids, trick questions, what to not in interviews and how to negotiate salary. We'll be bringing some of best industry experts to share their tips & advice.

Mock Interviews

Mock Interviews is the final step to become 100% prepared for taking on any interview question.

Minimum eligibility for Mock Interviews: Only students who have finished all task in 4 week Data Science Career Launchpad will be eligible for Mock Interviews
